

GraphAnchor: RAG Evaluation Report (30 Queries)

This document contains a side-by-side comparison of 30 different queries executed against both the Standard Vector RAG and the Hybrid Graph RAG models. It explicitly ensures successful document ingestion.

Query 1: What is the connection between Aris Thorne and Project Chimera?

Standard Vector RAG:

Aris Thorne submitted a request for Carbon Nanotubes for a completely different project, and Aris Vance, who will take over operations of Project Chimera, works in Marketing.

Hybrid Graph RAG:

Aris Thorne submitted a request for Lithium for a completely different project, and Jane Smith, who led Project Icarus, is now managing Project Chimera, which requires Titanium.

Query 2: How does the Phantom Protocol relate to Aetherium?

Standard Vector RAG:

Victor Vance secretly channels billions into the highly classified Phantom Protocol, which requires rare Xenotium Crystals to stabilize its core.

Hybrid Graph RAG:

There is no direct relationship between the Phantom Protocol and Aetherium in the provided evidence passages and knowledge graph relationships.

Query 3: What is the purpose of Facility 42?

Standard Vector RAG:

Facility 42 is not explicitly mentioned in the provided evidence passages. However, based on the information available, it can be inferred that Facility 42 is likely related to the Omega Initiative, given that a shortage of Uranium is stalling its development. The Uranium shortage is mentioned in doc_008_legal_dubai.txt, and Lithium, another key component, is mentioned in doc_010_legal_sector_9f.txt.

Hybrid Graph RAG:

Facility 42 is not explicitly mentioned in the provided evidence passages. However, based on the information available, it can be inferred that Facility 42 is likely related to the Omega Initiative, given that a shortage of Uranium in the Dubai facility is stalling its development.

GraphAnchor: RAG Evaluation Report (30 Queries)

Query 4: Who leads Lumina Corporation and what is their secret project?

Standard Vector RAG:

Jane Smith leads Lumina Corporation, but there is no information available on a "Lumina Corporation" in the provided evidence passages. However, Jane Smith is mentioned as the person who will take over operations of Project Chimera and is overseeing the logistics for Omega Initiative, which relies heavily on Lithium. There is no mention of a secret project associated with Jane Smith or Lumina Corporation.

Hybrid Graph RAG:

Victor Vance leads Aegis Global, the world's leading conglomerate. However, there is no information available on a person named Victor Vance leading Lumina Corporation.

Query 5: What links Echo Vanguard to the events in Facility 42?

Standard Vector RAG:

Echo Vanguard is linked to the events in Facility 42 through Victor Vance, who occasionally visits Sector 9F, where Echo Vanguard is managed. Furthermore, Victor Vance secretly channels billions into the highly classified Phantom Protocol, which is related to Phantom Strike (Game), a project that John Doe from Marketing will take over operations for, and which requires more Xenon Gas shipment to Sector 9F.

Hybrid Graph RAG:

There is no information provided in the evidence passages or knowledge graph relationships that links Echo Vanguard to the events in Facility 42.

Query 6: What is the true nature of Aetherium?

Standard Vector RAG:

Aetherium's true nature is not explicitly stated in the provided evidence passages. However, it can be inferred that Aetherium is related to Lithium, as the London office managed by Evelyn Sterling is overseeing the logistics for Omega Initiative, which relies heavily on Lithium. Furthermore, Dr. Aris Thorne submitted a request for Lithium for a completely different project, suggesting that Lithium is a key component of Aetherium.

Hybrid Graph RAG:

There is no explicit information provided in the evidence passages or knowledge graph relationships regarding the nature of Aetherium.

Query 7: What are the main details discussed in document 7 regarding its specific topic?

GraphAnchor: RAG Evaluation Report (30 Queries)

Standard Vector RAG:

Document 7 appears to be missing from the provided context. However, based on the information available in the other documents, it can be inferred that document 7 is likely related to the marketing of the game "Phantom Strike" or the operations in Sector 9F.

Given the context, it is unclear what the main details discussed in document 7 would be, as no information is provided about its content.

Hybrid Graph RAG:

Document 7, titled "Security Report," primarily discusses the management of the Sector 4B office and its logistics. Specifically, Evelyn Sterling is overseeing the logistics for Project Titan, which relies heavily on Lithium.

Query 8: What are the main details discussed in document 8 regarding its specific topic?

Standard Vector RAG:

Document 8 appears to be missing from the provided evidence passages. However, based on the information available, it can be inferred that the main details discussed in the relevant documents are related to the management and logistics of Sector 9F.

According to doc_010_legal_sector_9f.txt, Jane Smith from Legal is currently managing Sector 9F and overseeing the logistics for Omega Initiative, which relies heavily on Lithium. Additionally, doc_012_marketing_sector_9f.txt mentions that John Doe from Marketing will take over operations for Phantom Strike (Game) and that more Xenon Gas needs to be shipped to Sector 9F.

It is unclear what specific topic document 8 is related to, as it is not provided in the evidence passages.

Hybrid Graph RAG:

Unauthorized access was detected at the Sector 4B server farm, and Victor Stone from Security is investigating the breach related to Omega Initiative data.

Query 9: What are the main details discussed in document 9 regarding its specific topic?

Standard Vector RAG:

The main details discussed in document 9 regarding its specific topic are not explicitly stated in the provided evidence passages. However, based on the context, it can be inferred that document 9 is likely related to the operations or logistics of Sector 9F, as it mentions Jane Smith and the need for specific resources (Uranium and Xenon Gas).

Hybrid Graph RAG:

Document 9 primarily discusses the development status of Project Titan, specifically highlighting a shortage of Titanium

GraphAnchor: RAG Evaluation Report (30 Queries)

in the Tokyo facility, which has led to Jane Smith being tasked with resolving the issue.

Query 10: What are the main details discussed in document 10 regarding its specific topic?

Standard Vector RAG:

Document 10 is not explicitly mentioned in the provided evidence passages. However, based on the information available, it can be inferred that document 10 likely refers to the meeting notes of the board discussing Project Chimera. The main details discussed in document 10 regarding its specific topic are that Jane Smith from Legal will take over operations and that they need more Uranium shipped to Sector 9F.

Hybrid Graph RAG:

Document 10 primarily discusses the development status of Project Titan, specifically highlighting a shortage of Titanium in the Tokyo facility. Jane Smith has been tasked with resolving this issue.

Query 11: What are the main details discussed in document 11 regarding its specific topic?

Standard Vector RAG:

Document 11 appears to be missing from the provided context. However, based on the information available in the provided evidence passages, it can be inferred that document 11 may be related to the Uranium shipment to Sector 9F, as it is mentioned in the context of Project Chimera and Phantom Strike.

Hybrid Graph RAG:

Document 11 is not present in the provided context. However, based on the available evidence passages and knowledge graph relationships, it can be inferred that document 11 might be related to Project Titan, given the repeated mentions of this project in the provided passages.

If document 11 indeed discusses Project Titan, the main details that can be extracted from the provided context are:

Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility. This is also mentioned as a separate issue in the New York facility, where there is a shortage of Carbon Nanotubes. Additionally, Project Titan is stalling due to a shortage of Titanium in the Tokyo facility. The development of Project Titan is also stalling due to a shortage of Lithium in the Sector 4B facility, and this is being addressed by Alice Vance.

Query 12: What are the main details discussed in document 12 regarding its specific topic?

Standard Vector RAG:

According to document 012, the main details discussed regarding its specific topic, Phantom Strike (Game), are that John Doe from Marketing will take over operations and that they need more Xenon Gas shipped to Sector 9F.

GraphAnchor: RAG Evaluation Report (30 Queries)

Hybrid Graph RAG:

Document 12 appears to be missing, but based on the provided context, it can be inferred that the main details discussed in the documents relate to Project Titan and its stalling development due to various material shortages. The key details include:

- Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility.
- The development of Project Titan is also stalling due to a shortage of Carbon Nanotubes in the New York facility.
- Dr. Aris Thorne submitted a request for Carbon Nanotubes for a completely different project.
- Aris Vance has been tasked with resolving the shortage of Carbon Nanotubes in the New York facility.
- The development of Project Titan is stalling due to a shortage of Titanium in the Tokyo facility.
- Jane Smith has been tasked with resolving the shortage of Titanium in the Tokyo facility.

These details suggest that Project Titan is facing multiple material shortages, and various individuals have been tasked with resolving these shortages.

Query 13: What are the main details discussed in document 13 regarding its specific topic?

Standard Vector RAG:

Document 13 appears to be missing from the provided context. However, based on the information available in the provided evidence passages, it can be inferred that document 13 may be related to Project Chimera.

If document 13 is indeed about Project Chimera, it is likely that it will discuss the topic of Project Chimera, which involves the takeover of operations by different individuals from Marketing and Legal sectors, and the need for specific materials such as Uranium, Titanium, and Xenon Gas to be shipped to Sector 9F and Sydney, respectively.

Hybrid Graph RAG:

Document 13 appears to be missing. However, based on the provided context and relevant evidence passages, it can be inferred that document 13 may be related to Project Titan.

According to Passage 4, the development of Project Titan is stalling due to a shortage of Carbon Nanotubes in the New York facility. Passage 9 further confirms that the development of Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility. Passage 7 indicates that Evelyn Sterling is overseeing the logistics for Project Titan, which relies heavily on Lithium.

Query 14: What are the main details discussed in document 14 regarding its specific topic?

Standard Vector RAG:

Document 14 appears to be missing, as it is not mentioned in the provided evidence passages. However, based on the information available, it can be inferred that document 14 may be related to Project Chimera, as it is mentioned in the

GraphAnchor: RAG Evaluation Report (30 Queries)

meeting notes of documents 025, 022, and 012.

Hybrid Graph RAG:

Document 14 appears to be missing. However, based on the provided evidence passages and knowledge graph relationships, it can be inferred that document 14 might be related to Project Titan.

According to Passage 4 and Passage 9, the development of Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility. Additionally, Passage 7 states that Evelyn Sterling is overseeing the logistics for Project Titan, which relies heavily on Lithium.

Query 15: What are the main details discussed in document 15 regarding its specific topic?

Standard Vector RAG:

Document 15 appears to be missing from the provided context. However, based on the information available in the provided evidence passages, it can be inferred that document 15 is likely related to Project Chimera.

The main details discussed in the relevant evidence passages regarding Project Chimera include the following:

- * Jane Smith from Legal will take over operations, and more Uranium needs to be shipped to Sector 9F.
- * Aris Vance from Marketing will take over operations, and more Titanium needs to be shipped to Sydney.
- * John Doe from Marketing will take over operations, and more Xenon Gas needs to be shipped to Sector 9F.

These details suggest that Project Chimera involves multiple sectors and teams, with different materials being shipped to different locations.

Hybrid Graph RAG:

Document 15 appears to be missing. However, based on the provided context and relevant evidence passages, it can be inferred that document 15 might be related to Project Titan.

If document 15 is indeed about Project Titan, the main details discussed would likely include the stalling development of the project due to a shortage of Lithium in the Sector 4B facility, as mentioned in Passage 7 and Passage 9. Additionally, the fact that Dr. Aris Thorne submitted a request for Lithium for a completely different project (Passage 3) and that Victor Stone from Security is investigating the breach related to Omega Initiative data (Passage 8) might also be relevant.

Query 16: What are the main details discussed in document 16 regarding its specific topic?

Standard Vector RAG:

Document 16 appears to be missing from the provided evidence passages. However, based on the information

GraphAnchor: RAG Evaluation Report (30 Queries)

available, it can be inferred that document 16 likely discusses Project Chimera, as it is mentioned in the meeting notes of doc_025_legal_sector_9f.txt, doc_022_marketing_sydney.txt, and doc_012_marketing_sector_9f.txt.

Hybrid Graph RAG:

Document 16 appears to be related to Project Titan, as it discusses the development status of the project and the materials required to resolve the stalling issue. The main details discussed in document 16 regarding its specific topic are:

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in [Location Sector 4B]. This shortage is also related to [Entity Carbon Nanotubes], as [Entity Project Titan] is stalling due to a shortage of [Entity Carbon Nanotubes] in [Location New York].

Query 17: What are the main details discussed in document 17 regarding its specific topic?

Standard Vector RAG:

Document 17 is not explicitly mentioned in the provided evidence passages. However, based on the information available, it can be inferred that document 17 likely refers to the board discussion regarding the Uranium shipment to Sector 9F, as this topic is mentioned in both doc_025_legal_sector_9f.txt and doc_012_marketing_sector_9f.txt.

Hybrid Graph RAG:

Document 17 appears to be related to Project Titan, as it discusses the development status of the project and the materials required to resolve the stalling issue. The main details discussed in document 17 regarding its specific topic are:

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in our [Entity Sector 4B] facility. This shortage is also related to [Entity Carbon Nanotubes], as [Entity Project Titan] is stalling due to a shortage of [Entity Carbon Nanotubes] in our [Entity New York] facility.

Query 18: What are the main details discussed in document 18 regarding its specific topic?

Standard Vector RAG:

Document 18 is not mentioned in the provided evidence passages. However, based on the information available, it can be inferred that document 18 likely discusses Project Chimera, as it is mentioned in the meeting notes of doc_022_marketing_sydney.txt, doc_025_legal_sector_9f.txt, and doc_012_marketing_sector_9f.txt.

Hybrid Graph RAG:

Document 18 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 18 regarding its specific topic are:

GraphAnchor: RAG Evaluation Report (30 Queries)

Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility, and Alice Vance has been tasked with resolving this issue. Additionally, the project is also stalling due to a shortage of Carbon Nanotubes in the New York facility, and Dr. Aris Thorne submitted a request for Carbon Nanotubes for a different project.

Query 19: What are the main details discussed in document 19 regarding its specific topic?

Standard Vector RAG:

Document 19 appears to be missing from the provided evidence passages. However, based on the information available, it can be inferred that document 19 is related to Project Chimera, as it is mentioned in the meeting notes of both doc_025_legal_sector_9f.txt and doc_022_marketing_sydney.txt.

Hybrid Graph RAG:

Document 19 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 19 regarding its specific topic are:

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in its [Entity Sector 4B] facility. This shortage is also mentioned as a separate issue in [Entity Project Titan], which is stalling due to a shortage of [Entity Carbon Nanotubes] in the [Entity New York] facility.

Query 20: What are the main details discussed in document 20 regarding its specific topic?

Standard Vector RAG:

According to the provided evidence, document 20 appears to be missing. However, based on the information available in the other documents, it can be inferred that document 20 likely discusses Project Chimera. The main details discussed in document 20 regarding its specific topic are that Jane Smith from Legal will take over operations and that more Uranium needs to be shipped to Sector 9F.

Hybrid Graph RAG:

Document 20 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 20 regarding its specific topic are:

Project Titan is stalling due to a shortage of Lithium in its Sector 4B facility, and Alice Vance has been tasked with resolving this issue. Additionally, the project is also stalling due to a shortage of Carbon Nanotubes in the New York facility, and Dr. Aris Thorne submitted a request for these materials.

Query 21: What are the main details discussed in document 21 regarding its specific topic?

Standard Vector RAG:

GraphAnchor: RAG Evaluation Report (30 Queries)

According to document 021, the main details discussed in document 21 regarding its specific topic, Project Chimera, are that Jane Smith from Legal will take over operations and that more Uranium needs to be shipped to Sector 9F.

Hybrid Graph RAG:

According to the relevant evidence passage, document 21 appears to be missing. However, based on the information provided in documents 025, 022, and 030, it can be inferred that document 21 likely discusses Project Chimera. The main details discussed in document 21 regarding its specific topic are that it was noted that either Jane Smith from Legal or Aris Vance from Marketing will take over operations, and they need more Uranium or Titanium shipped to a specific location, although the exact location is not specified in document 21.

Query 22: What are the main details discussed in document 22 regarding its specific topic?

Standard Vector RAG:

Aris Vance from Marketing was noted to take over operations for Project Chimera, and it was mentioned that they require more Titanium to be shipped to Sydney.

Hybrid Graph RAG:

Document 22 is not explicitly mentioned in the provided context. However, based on the information available, it can be inferred that the main details discussed in the documents relate to Project Titan and its stalling development due to various material shortages, including Lithium and Carbon Nanotubes, and Titanium.

The documents also mention the involvement of Dr. Aris Thorne, Evelyn Sterling, and other individuals in managing and overseeing projects, as well as the locations of their offices and facilities. Additionally, there are mentions of other projects, such as Project Icarus, Project Chimera, and Omega Initiative, but their details are not as prominent as those related to Project Titan.

It is also worth noting that document 22 is not explicitly linked to any of the provided passages or knowledge graph relationships.

Query 23: What are the main details discussed in document 23 regarding its specific topic?

Standard Vector RAG:

According to document 23, the main details discussed regarding its specific topic, Project Chimera, are that Jane Smith from Legal will take over operations and that more Uranium needs to be shipped to Sector 9F.

Hybrid Graph RAG:

Document 23 appears to be related to Project Titan, as it discusses the development status of the project and the materials required to resolve the stalling issue. The main details discussed in document 23 regarding its specific topic are:

GraphAnchor: RAG Evaluation Report (30 Queries)

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in its [Entity Sector 4B] facility. Dr. Aris Thorne submitted a request for [Entity Lithium] for a completely different project.

Query 24: What are the main details discussed in document 24 regarding its specific topic?

Standard Vector RAG:

According to document 24, the main details discussed regarding its specific topic, Project Chimera, are that Jane Smith from Legal and Aris Vance from Marketing will take over operations, and that more Uranium and Titanium shipments are required, with the latter specifically destined for Sydney.

Hybrid Graph RAG:

Document 24 appears to be missing, but based on the provided context, it can be inferred that document 24 is related to Project Titan. The main details discussed in document 24 regarding Project Titan include its stalling development due to a shortage of Lithium in the Sector 4B facility, as well as a request submitted by Dr. Aris Thorne for Lithium for a different project.

Query 25: What are the main details discussed in document 25 regarding its specific topic?

Standard Vector RAG:

The main details discussed in document 25 regarding its specific topic, Project Chimera, are that Jane Smith from Legal will take over operations and that more Uranium needs to be shipped to Sector 9F.

Hybrid Graph RAG:

Document 25 is not explicitly mentioned in the provided context. However, based on the information available, it can be inferred that document 25 is related to Project Titan, as several passages (Passages 4, 7, 9, and 10) discuss its status and the materials required for its development.

The main details discussed in these passages regarding Project Titan include:

- * The development of Project Titan is stalling due to a shortage of Lithium in the Sector 4B facility.
- * The development of Project Titan is stalling due to a shortage of Titanium in the Tokyo facility.
- * Dr. Aris Thorne submitted a request for Lithium for a completely different project.
- * Dr. Aris Thorne submitted a request for Carbon Nanotubes for a completely different project.
- * Victor Stone occasionally visits Tokyo but does not manage Project Titan.
- * Evelyn Sterling manages the Sector 4B office and oversees the logistics for Project Titan, which relies heavily on Lithium.
- * The Sector 4B office is currently managed by Evelyn Sterling.
- * The development of Project Titan is stalling due to a shortage of Carbon Nanotubes in the New York facility.

GraphAnchor: RAG Evaluation Report (30 Queries)

* John Doe has been tasked with resolving the shortage of Uranium in the Dubai facility, which is related to the Omega Initiative.

Query 26: What are the main details discussed in document 26 regarding its specific topic?

Standard Vector RAG:

According to document 26, the main details discussed regarding its specific topic, Project Chimera, are that Jane Smith from Legal will take over operations and that more Uranium needs to be shipped to Sector 9F.

Hybrid Graph RAG:

Document 26 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 26 regarding its specific topic are:

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in the [Entity Sector 4B] facility. This shortage is also mentioned as a separate issue in document 26, where [Entity Alice Vance] has been tasked with resolving it.

Query 27: What are the main details discussed in document 27 regarding its specific topic?

Standard Vector RAG:

Document 27 appears to be missing from the provided evidence passages. However, based on the information available, it can be inferred that document 27 likely discusses the operational details of Project Chimera, as it is mentioned in both doc_025_legal_sector_9f.txt and doc_022_marketing_sydney.txt.

Hybrid Graph RAG:

Document 27 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 27 include the stalling of Project Titan's development due to shortages of Lithium and Carbon Nanotubes, as well as the tasking of resolving these shortages to Aris Vance and Alice Vance, respectively.

Query 28: What are the main details discussed in document 28 regarding its specific topic?

Standard Vector RAG:

Document 28 appears to be missing, but based on the provided context, it can be inferred that document 28 likely discusses Project Chimera. The main details discussed in document 28 regarding its specific topic are likely to include the project's operations, the personnel involved, and the materials required for its continuation.

Hybrid Graph RAG:

Document 28 appears to be related to Project Titan, as it discusses the development status of the project and the

GraphAnchor: RAG Evaluation Report (30 Queries)

materials required for its continuation. The main details discussed in document 28 regarding its specific topic are:

[Entity Project Titan], which is stalling due to a shortage of [Entity Lithium] in our [Entity Sector 4B] facility. This shortage is also mentioned as a separate issue in [Document Passage 4], where [Entity Aris Vance] has been tasked with resolving it. Additionally, [Entity Project Titan] is stalling due to a shortage of [Entity Carbon Nanotubes] in our [Entity New York] facility, as stated in [Document Passage 4].

Query 29: What are the main details discussed in document 29 regarding its specific topic?

Standard Vector RAG:

Document 29 is not explicitly mentioned in the provided evidence passages. However, based on the information available, it can be inferred that document 29 likely discusses the Uranium shipment to Sector 9F, as it is mentioned in the context of the board's discussion about Project Chimera and the need for more Uranium to be shipped to the sector.

Hybrid Graph RAG:

Document 29 appears to be related to Project Titan, as it discusses the development status of the project and the materials required for its continuation. The main details discussed in document 29 include the stalling of Project Titan's development due to a shortage of Lithium in the Sector 4B facility, as well as the task assigned to resolve this issue, which is attributed to Alice Vance.

Query 30: What are the main details discussed in document 30 regarding its specific topic?

Standard Vector RAG:

Document 30 appears to be missing from the provided evidence passages. However, based on the information available, it can be inferred that document 30 likely discusses Project Chimera, as it is mentioned in the meeting notes of documents 025, 022, and 012.

Hybrid Graph RAG:

Document 30 does not appear to be present in the provided context. However, based on the available evidence passages and knowledge graph relationships, it can be inferred that document 30 might be related to Project Titan, given the repeated mentions of this project throughout the passages.

If document 30 is indeed about Project Titan, the main details discussed would likely include the project's status, specifically the shortages of Lithium and Carbon Nanotubes, and the individuals tasked with resolving these issues, such as Alice Vance and Dr. Aris Thorne.
